Source: 2012 Census of Governments: Finance Survey of Public Pensions: State- and Locally-Administered Defined Benefit Data. Data users who create their own estimates using data from this report should cite the U.S. Census Bureau as the source of the original data only. The data in this table are based on information from public records and contain no confidential data. Although the data in this table come from a census of pension systems and are not subject to sampling error, the census results do contain nonsampling error. Additional information on nonsampling error and response rates may be found at http://www.census.gov/govs/reitre/how_data_collected.html.

Note: Detail may not add to total due to rounding.

Key:
(a) There are exceptions to the fiscal year rule for the state pension systems in Alabama, Michigan, and Texas. For systems in these states, the fiscal year moves beyond the June 30 cutoff. The data for survey year 2012 covers the fiscal year ending August 31, 2012 for Texas and September 30, 2012 for Alabama and Michigan. These exceptions are made to better align the data with the State Finance Survey.
