Opioid Crisis: How States Have Financed Treatment
Through its Substance Use Prevention and Treatment Initiative, Pew works to advance state and federal policies that address the toll of substance misuse, including expanded access to evidence-based treatment.
Medication-Assisted Treatment is Effective

- Medication-assisted treatment reduces:
  - Illicit opioid use
  - Overdose risk and fatalities
  - Unplanned health care utilization
  - Criminal activity
- And increases patients’ adherence to treatment

A Variety of Medications Are Available for Opioid Use Disorder
