## NUMBER AND TYPES OF PUBLIC ELEMENTARY AND SECONDARY SCHOOLS, BY STATE OR JURISDICTION: SCHOOL YEAR 2010–11—Continued

*Source:* U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "Public Elementary/Secondary School Universe Survey," 2007–08, Version 1a.

*Note:* Every school is assigned a school type based on its instructional emphasis; numbers and types of schools may differ from those published by state. A school may also be included under the Charter, Magnet, and/or Title I statuses, which are independent of one another and of school type.

*Key:*

N.A. — Not available.

n/a — Not applicable. Some states/jurisdictions do not have charter school authorization and some states/jurisdictions do not designate magnet schools.

N.R. — Reporting standards not met. Data reported for less than 80 percent of schools in the state of jurisdiction.

(a) Total number of operating schools excludes schools also reported by the Bureau of Indian Education (BIE). The numbers of operating

schools shared with BIE include two in Arizona, one in Michigan, and eight in North Dakota.

(b) Arizona, Massachusetts, New Jersey, and New Mexico have magnet schools but were not able to provide data that indicate school's magnet status. Total includes suppressed data due to unmet reporting standards.

(c) Schools eligible for Title I schoolwide programs are also included in the count of all Title I eligible schools. A Title I eligible school is one in which the percentage of children from low-income families is at least as high as the percentages of children from low-income families served by the local education agency (LEA) as a whole or because 35 percent or more of the children in the school are from low-income families. A schoolwide Title I eligible school has a percentage of low-income students that is at least 40 percent.

(d) "Reporting states" totals include the 50 states and the District of Columbia. A "reporting states" total, and not a "United States" total, is shown if data for any item in the table were not available for some, but not more than 15 percent, of all schools in the United States.
