**DEGREE GRANTING INSTITUTIONS AND BRANCHES, BY TYPE AND CONTROL OF INSTITUTION,
2012–2013— Continued**

Source: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), Fall 2012, Institutional Characteristics component. (This table was prepared August 2013.)

Note: Branch campuses are counted as separate institutions. Relative levels of research activity for research universities were determined by an analysis of research and development expenditures, science and engineering research staffing, and doctoral degrees conferred, by field. Degree-granting institutions grant associate's or higher degrees and participate in Title IV federal financial aid programs.

Key:

n/a - Not applicable

(a) Research universities with a very high level of research activity

(b) Research universities with a high level of research activity.

(c) Institutions that award at least 20 doctor's degrees per year, but did not have a high level of research activity.

(d) Institutions that award at least 50 master's degrees per year.

(e) Institutions that primarily emphasize undergraduate education.

(f) Four-year institutions that award degrees primarily in single fields of study, such as medicine, business, fine arts, theology, and engineering. Includes some institutions that have 4-year programs, but have not reported sufficient data to identify program category. Also, includes institutions classified as 4-year under the IPEDS system, which had been classified as 2-year in the Carnegie Classification system because they primarily award an associate's degree.
