

# THE BOOK OF THE STATES 2011

## Facts & Figures

### TRENDS IN STATE GDP: 2010

Nearly every state saw an increase in real gross domestic product<sup>1</sup> in 2010—a welcome sign of economic recovery after two straight years of drops in the national average. Each region performed differently, with a few states posting impressive 4-plus percent gains and a majority of states falling between 1.5 and 3.5 percent.

#### National Analysis

- ▶ A June 2011 report by the Bureau of Economic Analysis reveals that real GDP increased in 48 states and the District of Columbia in 2010 over 2009 with a national average increase of 2.6 percent.
- ▶ The only states to have a drop in year-over-year GDP were Nevada and Wyoming, each decreasing by less than half a percent. Indiana, Massachusetts, New York, North Dakota and West Virginia each experienced big gains in GDP, all growing by 4 percent or more, with North Dakota posting an impressive 7.1 percent increase over 2009.
- ▶ Durable-goods manufacturing was the biggest contributor to real GDP growth in a slight majority of states—29—while retail trade contributed to growth in every state. Construction, however, continued to drag down recovery, declining for the sixth consecutive year and bringing down the growth rate in most states.

#### Regional Analysis

- ▶ With average year-over-year GDP growth at 2.4 percent, CSG's Southern region fell just below the national average of 2.6 percent.
- ▶ Tennessee (3.5 percent) and Virginia (4 percent) posted the biggest increases, while Oklahoma (1 percent) and Mississippi (1.1 percent) had the most modest gains in the region.

#### Gross Domestic Product

	(GDP in millions of chained 2005 dollars)		Change (%) 2009-2010
	2009	2010*	
United States	\$12,773,853	\$13,099,722	2.6
Oklahoma	\$132,078	\$133,464	1.0
Mississippi	\$86,096	\$87,075	1.1
Florida	\$664,084	\$673,375	1.4
Georgia	\$357,160	\$361,993	1.4
Missouri	\$214,283	\$217,320	1.4
Alabama	\$151,044	\$154,124	2.0
Arkansas	\$89,742	\$91,828	2.3

<sup>1</sup> GDP is calculated as the sum of what consumers, businesses and government spend on final goods and services, plus investment and net foreign trade. All figures were prepared by the Bureau of Economic Analysis in chained (2005) dollars, which provides an inflation-adjusted measure of each state's gross product that is based on national prices for the goods and services produced within that state. For more information, visit [www.bea.gov](http://www.bea.gov).
