## FEDERAL AND STATE FINANCES

### FEDERAL GOVERNMENT INSURANCE PROGRAMS — VOLUME OF COVERAGE PROVIDED BY STATE AND OUTLYING AREA: FISCAL YEAR 2006 — *Continued*

---

*Source:* U.S. Department of Commerce, Bureau of the Census, Consolidated Federal Funds Report for Fiscal Year 2006, April 2008.

*Note:* Amounts represent dollar volume of the face value of insurance coverage provided during the fiscal year. Detail may not add to total due to rounding. The CFDA defines "Insurance" as "Financial assistance provided to assure reimbursement for losses sustained under specified conditions. Coverage may be provided directly by the federal government or through private carriers and may or may not involve the payment of premiums." All data on insurance programs of the federal government, with the exception of data on flood insurance, come from the FAADS. National Flood Insurance data (CFDA number 97.022), reflecting insurance in force on September 30, 2006, are from FEMA, Department of Homeland Security. Insurance program amounts reflect the volume of insurance activities. Insurance data do not represent actual expenditures associated

with the loan or insurance programs. Any actual outlays under these programs, such as insurance claims paid by the federal government, appear in the direct payments categories in the CFFR. Federal government contingent liability can vary by program, and caution should be used in comparing one federal loan or insurance program to another, or in interpreting the data presented to reflect actual federal outlays over time.

The following also should be noted:

1. Amounts insured do not necessarily represent future outlays.
2. All amounts reflect the dollar value of insurance coverage provided during the fiscal year, and not the cumulative totals of such activity over the life of the program.
3. Programs otherwise similar can vary in the share of the total liability that the federal government guarantees or insures.
